

LNG Flow Measurement for Tanker Vehicles and stationary Applications

Advantages

- Lifetime warranty on metering section, because of no moving parts
- High accuracy
- Long term stability
- Easy operation
- With PumpSmart functionality:
 - Pump operation lock-out if not properly cool down
 - Pump operation shut-down if tank runs dry
 - Hour counter with service warning (temporarily locks out pump if ignored)

Features

- Microprocessor electronics
- Serial interface RS232
- Data memory
- Quantity preselection
- Printing of daily reports
- European type approval based on MID
No.: DE-07-MI005-PTB002

Flow metering system with ticket printer in stainless steel enclosure

Components

Ticket printer TM295

Temperature sensor PT100

DP-Transmitter
